## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

### **Regarding independent claims 63 and 74**

The prior art of record neither anticipates nor fairly and reasonably teaches a method for making a monetary gift, comprising, *inter alia*, further transmitting, via the network, the transmitted electronic greeting card including a hyper-link and the notification of the monetary gift to a non-designated recipient.

The prior art of record neither anticipates nor fairly and reasonably teaches a system for making a monetary gift, comprising, *inter alia*, the communication port further configured to receive, via the network over the hyperlink, information identifying a non-designated recipient subsequent to a transmission of the electronic greeting card.

The most noteworthy prior art of record is to: Van Dusen (US Patent No. 6,175,823) and Albrecht (US Patent No. 5,984,180). Claims 63 and 74 require that the designation of the recipient, the e-mail address, is made by the donor. Van Dusen does not change the recipient of the e-mail message, but rather allows the recipient to select one of the multiple accounts associated with the e-mail address that should be credited with the money from the gift.

None of the prior art of record remedies the deficiencies found in Van Dusen and Albrecht. Furthermore, neither the prior art, the nature of the problem, nor knowledge of a person having ordinary skill in the art, provide any reasonable rationale to combine prior art teachings.

**Regarding independent claims 64 and 75**

The prior art of record neither anticipates nor fairly and reasonably teaches a method for making a monetary gift, comprising, *inter alia*, debiting a payment account at a financial institution associated with the requesting donor.

The prior art of record neither anticipates nor fairly and reasonably teaches a system for making a monetary gift, comprising, *inter alia*, the payment account associated with the donor is directed to be debited at a time subsequent to an activation of a hyper-link included in the transmitted electronic greeting card.

The most noteworthy prior art of record is to: Van Dusen (US Patent No. 6,175,823) and Albrecht (US Patent No. 5,984,180). Van Dusen teaches crediting of the recipient's account after activating the hyper-link, not debiting the donor's account after activation of the hyper-link.

None of the prior art of record remedies the deficiencies found in Van Dusen and Albrecht. Furthermore, neither the prior art, the nature of the problem, nor knowledge of a person having ordinary skill in the art, provide any reasonable rationale to combine prior art teachings.

**Regarding independent claims 66 and 77**

The prior art of record neither anticipates nor fairly and reasonably teaches a method for making a monetary gift, comprising, *inter alia*, wherein the request is received from an electronic greeting card service.

The prior art of record neither anticipates nor fairly and reasonably teaches a system for making a monetary gift, comprising, *inter alia*, wherein the request is received from an electronic greeting card service.

The most noteworthy prior art of record is to: Van Dusen (US Patent No. 6,175,823) and Albrecht (US Patent No. 5,984,180). Van Dusen does not present evidence of how the recipient's Internet Service Provider generates the greeting card, rather it appears that the ISP merely forwards the electronic greeting card.

None of the prior art of record remedies the deficiencies found in Van Dusen and Albrecht. Furthermore, neither the prior art, the nature of the problem, nor knowledge of a person having ordinary skill in the art, provide any reasonable rationale to combine prior art teachings.

**Regarding independent claims 68 and 79**

The prior art of record neither anticipates nor fairly and reasonably teaches a method for making a monetary gift, comprising, *inter alia*, transmitting, via the network, the generated electronic greeting card to an electronic greeting card service prior to transmitting the electronic greeting card to the designated recipient.

The prior art of record neither anticipates nor fairly and reasonably teaches a system for making a monetary gift, comprising, *inter alia*, wherein the communication port is further configured to transmit, via the network, the generated electronic greeting card to an electronic greeting card service.

The most noteworthy prior art of record is to: Van Dusen (US Patent No. 6,175,823) and Albrecht (US Patent No. 5,984,180). Van Dusen does not show the donor generates the electronic greeting card and forwards it to the sponsoring merchant.

None of the prior art of record remedies the deficiencies found in Van Dusen and Albrecht. Furthermore, neither the prior art, the nature of the problem, nor knowledge of a person having ordinary skill in the art, provide any reasonable rationale to combine prior art teachings.

### **COMMENTS**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/13/2007 has been entered.

### **DRAWINGS**

The drawings were received on 2/27/2007. The Examiner accepts these drawings.
